Project Title: Fallingwater Website

- Something seems off with the alignment of the text on the home page
 - The “Best All Time...” starts to get a little bit lost → Plan: move up
 - Maybe try left aligning all of this text to resolve both issues
- More color incorporated into the body pages – it doesn’t have to be a lot
 - An idea is to make the headings a different color or the introductory sentence on each page
- Not loving the way the home page image crops and stays on the rest of the pages. I like the idea, but the cropping doesn’t look intentional. The footer image is too narrow
 - Re-crop the image for top bar and make footer wider
- At some sizes, particularly the largest desktop size, the images on the construction page touch and you can’t see the caption for the top image
